Avaya 9610

Avaya 9610 IP Telephones are specifically designed for walk-up use, meaning use in common areas such as lobbies, secondary conference rooms, and printer or copier rooms. The 9610 is not intended to be associated with an individual user, but rather is associated with a location and will be shared by visitors and building employees

Avaya 9620

A member of the Avaya one-X™ Deskphone Edition family, the 9620 IP Telephone is specifically designed for the everyday telephone user-those who rely on multiple communications tools such as e-mail and IM, yet still require a high quality and intuitive telephone for voice communications.

Avaya 9630

A member of the Avaya one-X Deskphone Edition family, the 9630 IP Telephone is specifically designed for the essential telephone user, where the telephone is necessary in order for them to complete their job. Sales people, relationship managers, and attorneys are typical examples of the essential users profile.

Product Brochure

9610

The 9610 interface is simple and intuitive. Extra features and buttons typically required by power users were removed from the 9610 to keep the experience simple and easy for walk-up users.

Through its integrated web browser and backlit display, the 9610 supports productivity enhancing phone applications such as access to building directories, visitor information, news and events. With its dual position flip stand, the 9610 makes a smart-looking addition to any building lobby or visitor area.

9620

The 9620 features several LED lights and buttons. LED lights on the side of the display provide explicit status of different line appearances, while LEDs built into several buttons on the phone such as Mute, Message, and Headset provide an intuitive and simple experience for the everyday end user.

The user interface on the 9620 is helpful and intuitive. So completing call transfers and setting up ad hoc conference calls is simple and can be executed with confidence - even for the casual, everyday user.

Beginning in June '07, the 9620 will support SIP telephony features along with additional SIP enhancements - including display of telephone "presence" of other users from the phone contact list, integration with MS Outlook calendar appointments, changeable display skins.

9630

The 9630 provides superior, high fidelity audio, built in "one touch" access to key Avaya Communication Manager mobility features, and a stylish professional design.

The 9630 has several LED buttons throughout the front of the phone. Six LED line appearance buttons on the side of the display provide explicit status of different line appearances and administered features, while LEDs built into several buttons on the phone such as Mute, Message, and Headset provide an intuitive and simple experience for the everyday end user.

The user interface on the 9630 is helpful and intuitive. Completing call transfers and setting up ad hoc conference calls can be executed with confidence. The 9630 has a dedicated Call Forward / Mobility button which provides direct access to Communication Manager Mobility features. Extension to Cellular and Extend Current Call are examples of features critical to the essential user.

Beginning in June '07, the 9630 will support SIP telephony features along with additional SIP enhancements - including display of telephone "presence" of other users from the phone contact list, integration with MS Outlook calendar appointments, changeable display skins.

The 9630 supports a 24 button expansion module. This provides the essential user with additional call appearances, bridged appearances and administered feature keys including speed dials.

9640

The 9640 provides superior high fidelity audio, built-in "one touch" access to key Avaya Communication Manager mobility features, and a stylish and professional design.

The 9640 supports up to 24 call appearances/administered feature keys with six concurrent line appearances visible at any time. The 9640 has several LED buttons throughout the front of the phone. Six LED line appearance buttons on the side of the display provide explicit status of different line appearances and administered features, while LEDs built into several buttons on the phone such as Mute, Message, and Headset provide an intuitive and simple experience for the everyday end user.

The user interface on the 9640 is helpful and intuitive. Completing call transfers and setting up ad hoc conference calls is simple and can be executed with confidence. The 9640 has a dedicated

g3 telecommunications

Avaya 9640

A member of the Avaya one-X Deskphone Edition family, the 9640 IP Telephone with high resolution colour display is specifically designed for the essential telephone user. Essential users are those who deems the telephone as essential for doing their jobs. Sales people, relationship managers, and attorneys are typical examples of essential users.

Avaya 9650

A member of the Avaya one-X Deskphone Edition family, the 9650 IP Telephone is specifically designed for the "navigator" telephone user. Navigators, such as building receptionists and executive admin staff, manage calls for themselves and for groups of people as a big part of their jobs.

Call Forward/Mobility button, which provides direct access to Communication Manager Mobility features. Some of these features, such as Extension to Cellular and Extend Current Call, are critical to the essential user.

Beginning later in the summer of '07, the 9640 will support SIP telephony features along with additional SIP enhancements - including display of telephone "presence" of other users from the phone contact list, integration with MS Outlook calendar appointments, changeable display skins.

The 9640 supports a 24-button expansion module. This provides the essential user with additional call appearances, bridged appearances and administered feature keys including speed dials.

9650

The 9650 features built-in button module functionality with one-touch access to bridged appearances, speed dials and feature keys. When used with Avaya Communication Manager 4.0, the 9650 supports up to three SBM 24-button expansion modules.

Smart, sleek, stylish and highly functional, the Avaya 9650 IP Telephone is designed for the Navigator user profile--someone who primarily speaks on the phone for the majority of each day. Common "navigator" tasks include answering incoming calls, transferring callers to other extensions and monitoring several bridged appearances throughout the day. The Avaya 9650 IP Telephone delivers advanced communications capabilities, high definition audio, an integrated WML application interface, and comprehensive one-touch access. This is the ideal solution for receptionists, executive assistants, contact center agents as well as knowledge workers who need quick access to features and call appearances.

The Avaya 9650 IP Telephone supports higher quality wideband audio in both the handset as well as the speakerphone, which provides crystal clear audio with the elimination of background noise. The backlit display and intuitive interface simplifies access to Avaya Communication Manager features. Some features simultaneously manage multiple calls while selectively muting and dropping conference call participants. The 9650 supports built-in button module functionality (eight physical buttons with shift capability for a total of 16 feature keys) to provide simple one-touch access to bridged appearances, speed dials and feature keys. And, with its dual position flip stand, the 9650 makes a smart-looking addition to any desk. Through its integrated web browser and application interface, the 9650 supports productivity enhancing phone applications such as LDAP corporate directories and integration with Microsoft Outlook calendars.
